

STUDIO

LA TAL

Since 1986, when Companyia d'Espectacles **LA TAL** was founded, up to the present date, the theatrical concept, the visual perception and the interpretive technique has evolved from the classic circus clown figure into the creation of an entire universe on its own, in which characters, aesthetics, and situations are decidedly positioned in a type of humorous theatre that is totally up to date, in which the images and the stories, with the aid of sporadic words, gives the shows an ideal equilibrium to allow the public – kids as well as adults – the necessary collaboration in the different stories that are intertwined in each one.

The still set and moving street shows are both unexpected and highly participative, as well as being very versatile. There is always an element of surprise, and the magic of an image that at times seems to come from story tales and at other times from cartoon animation.

The participation of the public is a constant element, without making the audience uncomfortable.

Naturally, these fifteen years of professional experience can account for the natural evolution of their shows, bringing original twists to the visual mold of the classic ideas of the world of the clown, just as it is reflected in their shows.

Travelling show

Les Fotografiers arrive on an incredible vehicle, carrying the material of some crazy photographers that will surprise their audience appearing in the middle of any space.

Playing with the public and winning their complicity, they will take funny pictures of everyone posing in many various ways.

The famous photographers Gastón and Pájago Voladog, known around the world as *Les Fotografiers*, arrive offering to the audience their original and authentic family pictures.

With just a little bit of patience and the biggest of the smiles, despite the appearances; if they put the film in the camera, if they find the lost framing, we can assure you that you will be the main characters of the craziest picture anyone has ever taken from you.

¡¡ Madams et mesiés !! ¡¡ Ladies and gentlemen !! Say...cheese!!

ARTISTIC ASPECTS
